Coalition Urges Louisiana Legislature To Override Jindal's Cigarette Tax Veto

Written by Bayoubuzz Staff Tuesday, 14 June 2011 09:09

The Better Choices For A Better Louisiana Coalition are urging the Louisiana legislature to override a veto lodged by Governor Bobby Jindal over the issue of the cigarette tax extension passed by the Legislature during the current session.

Here is the statement by the Coalition:

Calling Governor Bobby Jindal's veto of a tobacco tax renewal irresponsible and indefensible, the Better Choices for a Better Louisiana Coalition today urged lawmakers to stand up to the governor and override the veto.

Saying that the governor's decision places political ideology above the health of the people and the fiscal stability of the state, the coalition stressed reasons why House Bill 591 by Rep. Harold Ritchie (D-Bogalusa) should stand.

The four-cent tax on a pack of cigarettes has been on the books since 2000, and generates about \$12 million a year, dedicated to providing health care services. The revenue is used to trigger even more money as matches for federal funds.

Affordable plans for Louisiana residents of all ages

At just 36 cents per pack, Louisiana already has one of the lowest tobacco taxes in the nation; reducing it by four cents has economists and health care experts scratching their heads about the wisdom of Gov. Jindal's veto.

"Vetoing this bill is one of the worst choices a leader can possibly make," said Eddie Ashworth, director of the Louisiana Budget Project and a founding member of the **Better**

Choices for a Better Louisiana Coalition. "It is bad policy for the health of the state, and it is bad fiscal policy to reduce revenues when the state is already facing a budget crisis."

Louisiana Federation of Teachers President Steve Monaghan, also a founding Coalition member, said the governor's decision directly contradicts the wishes of the people of the state.

"The people understand that Louisiana has one of the worst health care records in the nation," Monaghan said, "and they believe that taxing cigarettes is one way to discourage smoking and to help pay for the damage caused by addition to tobacco."

Monaghan pointed out that in a recent survey by the LSU Manship School of Mass Communication, 68.2 percent of the people believe that cigarette taxes should actually be increased.

"We understand that Gov. Jindal has drawn a line in the sand with his no new taxes pledge," Monaghan said. But on one side of this line are cheaper cigarettes, addiction, cancer and death. On the other side is better health. There ought to be no political downside for the governor to allow the extension of this existing tax."

Ashworth added, "We believe the legislature made a poor choice when it refused to raise cigarette taxes. But turning back the clock to reduce taxes on a dangerous product is even worse. It will both harm the health of our people and create more instability in our budget.

Coalition partner Melissa Flournoy, president of Progress Louisiana, urged lawmakers to stand up to the governor.

"The legislature should be commended for their leadership in passing the renewal of the cigarette tax," Flournoy said. "They should stick to their votes and override a veto."

Better Choices for a Better Louisiana—a broad coalition of organizations representing more than a half-million people in the state—advocates for a balanced, transparent approach to solving Louisiana's fiscal crisis rather than relying solely on short-sighted cuts to services needed by working families. The coalition believes the state cannot sustain another deep budget cut before risking serious, long-term damage to the state and its people.

This is all so dumb! Voting down any tax renewal will only make the state cut jobs, raise college tuition, close state facilities and injure our health programs. Cutting taxes doesn't create jobs! (George Bush made huge tax cuts and look where we are.) Those who forget history are doomed to repeat it.

I find this theory about taxing cigarettes will save Louisiana! Come on NOW, the reality of the taxing in Louisiana is only for those who are really not thinking. Louisiana has so many chemical companies that is causing the health problems status! Why aren't the state of Louisiana taxing the real reason why "Health Problems in Louisiana". Because they don't want to touch the companies. The real cause is by the chemical companies? Everyday, the people of Louisiana wake-up too some kind of respiration problem, coughing, running noses, wheezing, squeezing, rashes on the body, watery and burning eyes. The dermatology doctors are making so much money in Louisiana. What is dumb, the people of Louisiana thinks taxing ciigarettes will save Louisiana!

... Shirley, You are right that the cigarette tax won't cure the problem, but when you don't have enough money to pay the bills why cut this or any tax?
